PREVENT RANSOMWARE MITIGATE EMAIL PHISHING

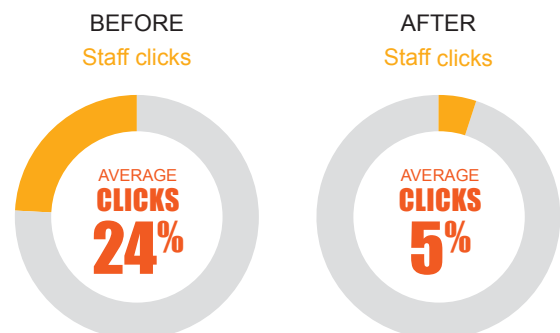

Adura is committed to delivering cyber security solutions tailored for business success.

We use a holistic and complete consultative approach to tailor effective mitigation of email security risks across your organisation. Through a combination of tactics, our dedicated cyber security professionals will work with you to implement practical measures that will secure your company from phishing threats.

These include managed phishing simulation, risk assessment and security analysis, complemented by customised workforce training to enable your employees to be the first line of defence for your business.

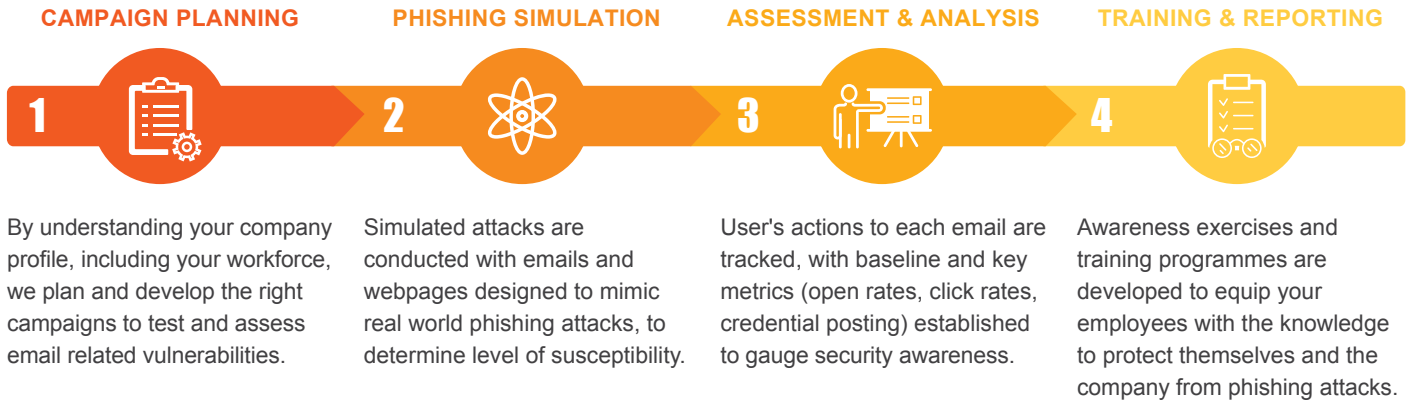

Run an email phishing assessment with Adura now, to get the most complete picture of your company's susceptibility to email threats and ransomware.

Proof is in the Numbers

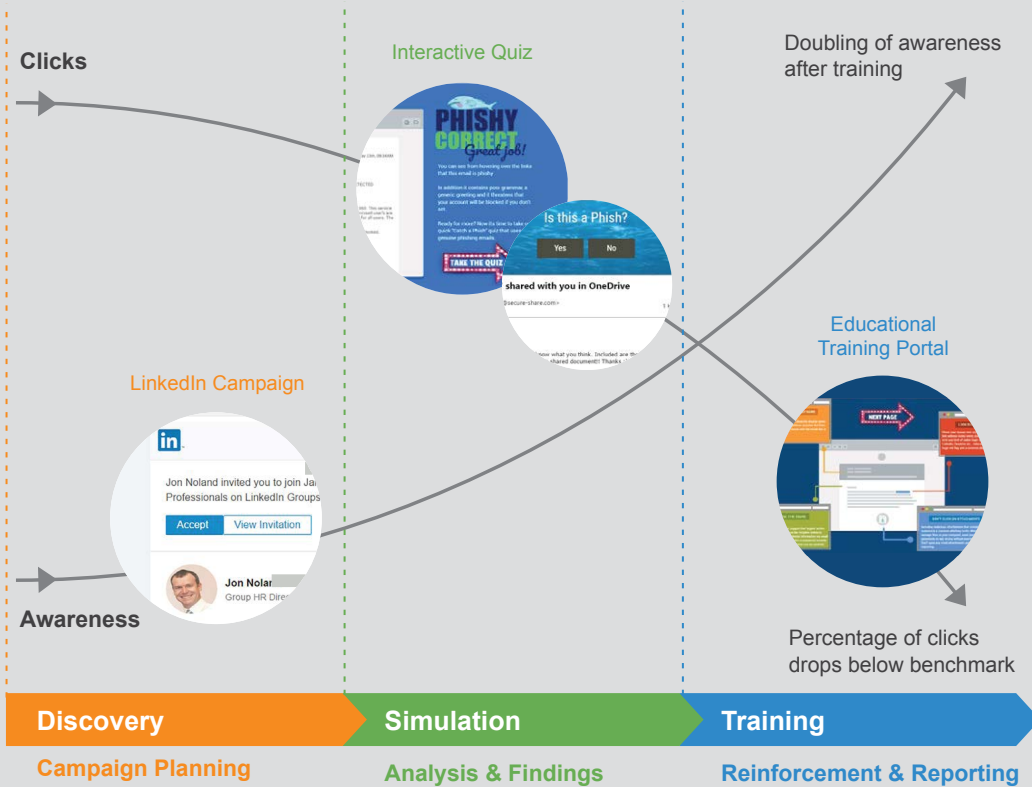

Our Email Phishing Assessment is designed to increase employee awareness of phishing threats. We target to reduce the percentage of staff clicks to below the 5% benchmark.

DISCOVER ADURA'S 4-STEP CONSULTATIVE APPROACH

MITIGATION OF EMAIL THREATS IS A JOURNEY

The comprehensive exercise we conduct is designed to help your company achieve its desired security outcomes, such as increased overall awareness of phishing and ransomware threats, and reduced number of employees at risk from phishing emails.

Journey with ADURA for 3 DESIRED OUTCOMES

- 1. Risk Mitigation:** Customised simulation campaigns with follow-up remediation activities will mitigate risk exposure from employees who might fall for phishing attacks.
- 2. Knowledge Transfer & Retention:** Dedicated training resources such as Interactive Quiz and an Awareness Training Portal enable effective knowledge transfer and reinforcement among your employees to successfully keep phishing threats at bay.
- 3. Comprehensive Phishing Protection:** The workforce training programme will heighten employees' awareness of phishing, and instill in them the knowledge to avoid falling prey to email phishing attacks.
