

# ETHICAL HACKING

## CYBER RECONNAISSANCE SERVICE

Companies in Asia-Pacific are 80% more likely to be targeted by hackers compared to other regions, with existing network infrastructure found to be increasingly vulnerable to cyber attacks.\*

Find out where your company's security exposures are by conducting comprehensive penetration testing of your enterprise and security systems.

**We can help you identify security blind spots and exposure before the hackers do.**

\*Mordor Intelligence report: Asia-Pacific Cybersecurity Market 2018

## THE RISE OF CYBERSECURITY DAMAGES IN ASIA PACIFIC

**USD 81 billion**

Amount lost in 2016 to cyber attacks in the region

**USD 11.7 million**

Average annualised cost of cybersecurity in 2017

## ELIMINATE VULNERABILITIES

Penetration testing can help you identify and eliminate vulnerabilities by revealing hard-to-detect security system loopholes.

Adura ethical hacking assessments leverage a wide variety of tools and techniques to replicate hacker activity. Using the latest industry standards, methods, tools and techniques, our ethical hackers will diligently work with your IT team to comb through your company's systems to identify security exploits.

# ETHICAL HACKING PROCESS

## CHECKPOINTS

## WHY ADURA?

We are fully CREST certified and soon to be a PCI Approved Scanner Vendor (ASV-PCI) company, with breadth of service that's not typically found in consultancy companies.

We follow best practice pentest frameworks:

- OSSTMM (Open Source Security Testing Methodology Manual)
- OWASP (Open Web Application Security Project)
- NIST SP 800-115 (National Institute of Standards and Technology)
- PTES Technical Guidelines (Penetration Testing Execution Standard)
- CIS (Centre for Internet Security)
- CREST

Our pentesters have an average of 15+ years of experience, and are all fully qualified with the latest certifications.

We only use the latest pentest tools:

- Rapid7
- Nessus
- Kali
- Qualys
- Burpsuite
- ...and many more
- Acunetic
